

SUPPLEMENTARY TABLES

Supplementary Table 1: Participants Knowledge on Vaccination

Item Description	Mean (SD)	Correct answers (%)
Healthy children do not need immunization	0.98 (0.13)	98.4
There are different types of vaccines	0.99 (0.11)	98.7
Active immunization is a killed or weakened form of a disease-causing agent	0.81 (0.39)	81
Vaccination is for all ages	0.81 (0.40)	80.7
Children get too many vaccines in the first two years of life	0.41 (0.49)	40.8
The immunization of children should be started at birth	0.90 (0.30)	90
In some health situations, vaccines should not be given	0.63 (0.48)	63
Vaccines can be given in combination	0.67 (0.47)	67.2
If the child receives extra immunization, it is more effective and safer	0.79 (0.40)	79.4
More than one dose of vaccine may be required for complete protection	0.87 (0.34)	87.1
TOTAL	7.86 (3.51)	

Supplementary Table 2: Participants Practice on Vaccination

Item Description	Mean (SD)	Correct answers (%)
Were you informed about vaccination?	0.89 (0.32)	88.7
Did you read about vaccination in the media?	0.65 (0.48)	65.3
Did you see a television programme about vaccination?	0.31 (0.46)	30.9
Did you hear about vaccination on the radio?	0.35 (0.48)	35.4
Did you read about vaccination on the internet?	0.59 (0.49)	59.5
Did you obtain information about vaccination from an antenatal clinic?	0.70 (0.46)	70.1
Did you obtain information about vaccination from a maternity hospital or home?	0.87 (0.34)	86.8
Do you think you have access to enough information on immunization?	0.68 (0.47)	67.8
Do you know your child's immunization appointment?	0.87 (0.34)	86.8
Is it important to follow immunization schedule?	1.00 (0.06)	99.7
TOTAL	6.91 (3.9)
